Higher State College of Communications

Telecommunications technician (Honours degree) – 2013

Additional experience

- English – Upper Intermediate
- Experience in Pascal, Delphi, C, C#, Java

About myself

I'm a creative person with a technical mindset. I can crack surface integrals like nuts (okay, that's already in the past) and make toys and figurines (this is already in the present) equally well. I'm really into good versatile movies and captivating books, I follow cybersport events and enjoy playing videogames. I'm honest (I told you about videogames) and non-conflicting person with a punch of perfectionism and self-criticism. I'm really inquisitive too. They say I'm good at jokes so team chat members never get bored ☺ And sign me up for Friday events!
